- Episode Name: Vulnerability Classification
==

Vulnerability Classification

Objectives:

- List and describe the different vulnerability types discovered during VA

- Classifications
    - Misconfigurations
    - Missing Patches/Updates
    - Application Flaws (coding errors???)
    - Using Default Creds/Configs
    - Design Flaws (logic/code???)
    - Open Services
    - Buffer Overflows
    - OS Flaws
