

# DOCKER

---

*Docker Network Command Management*

## *Docker : Docker Network Command Management*

---

- Create New Network on Host Machine  
`docker network create`
- Above command creates 'bridge' network by default.
- Create a bridge network  
`docker network create -d bridge my-bridge-network`

## *Docker : Docker Network Command Management*

---

- Connect Network with Container

`docker network connect network1 container1`

- Connects a container to a network. You can connect a container by name or by ID.
- After connection, the container can communicate with other containers in the same network.

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the fingers gripping the marker. The text is written in a fluid, handwritten style.

*See you in next lecture ...*
