

# DOCKER

---

*Docker Network DNS*

## *Docker : Docker Network DNS*

---

- DNS stands for Domain Name System.
- DNS is how domain names are translated into IP addresses.  
DNS is what allows you to use your web browser to find web sites.
- DNS makes it possible for us to use easy to remember domain names in place of complex IP addresses.

## *Docker : Docker Network DNS*

---

- Containers uses DNS to communicate.
- Containers don't use IP address to Communicate.

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the marker tip touching the paper. The background is plain white.

*See you in next lecture ...*
