Terraform: If-Else Conditions

➤ Terraform provide option to put conditions in HCL.

➤ Booleans can be used in a Terraform tenerary operation to create an if-else statement -

```
CONDITION ? TRUEVAL : FALSEVAL
```

➤ Example -

```
resource "aws_eip" "web-eip" {
  count = var.create_eip == true ? 1 : 0
}
```

➤ Conditional Support Operators.

    ➤ Equality : == and !=

    ➤ Numeric Comparison :
       > , < , >= , <=

    ➤ Boolean logic :
       && , ||, Unary !
