

Compiling and Installing Bettercap

If you want to compile and install Bettercap on Ubuntu or Linux Mint since it does not exist in the standard repositories, follow the steps bellow:

1. Installing Go

```
sudo apt update
```

```
sudo apt install golang-go
```

```
in ~/.bashrc
```

```
export GOPATH=$HOME/go
```

```
export PATH=$PATH:$GOPATH/bin:/usr/local/go/bin
```

2. Installing Bettercap

```
apt update
```

```
apt install libusb-1.0-0-dev libusb-dev libpcap-dev libnetfilter-queue-dev git
```

```
go get github.com/bettercap/bettercap
```

```
which bettercap
```

```
/home/andrei/go/bin/bettercap
```

```
sudo bettercap -h
```

Bettercap can also be compiled from sources like this:

```
cd $GOPATH/src/github.com/bettercap/bettercap
```

```
make build
```

```
sudo make install
```

Note: You might encounter issue like "error while loading shared libraries: libpcap.so.1: cannot open shared object file: No such file or directory"

recommended solution:

```
$ sudo ln -s /usr/lib/x86_64-linux-gnu/libpcap.so.1.8.1 /usr/lib/libpcap.so.1
```
