

Findomain Fastest Subdomain Resolver

The screenshot shows the GitHub repository page for Findomain. At the top, the repository name 'Findomain / Findomain' is displayed, along with a 'Sponsor' button, a 'Watch' button with a dropdown arrow, the number '45', a 'Star' button, and the number '1.6'. Below this, navigation links for 'Code', 'Issues 3', 'Pull requests', 'Actions', 'Projects', 'Wiki', 'Security', and 'Insights' are visible. The main content area shows the 'master' branch selected, with '2 branches' and '63 tags' indicated. There are buttons for 'Go to file', 'Add file', and 'Code'. A commit history table is shown with the following entries:

Commit	Author	Message	Time
4692d57	Edu4rdSHL	Update README.md	on 7 Oct
			645 commits
		.github Update FUNDING.yml	2 months ago
		config_examples Create findomain.example.json	5 months ago
		docker Add dockerhub option for using the docker image.	last month

On the right side, there is an 'About' section with the text: 'The fastest and cross-platform subdomain enumerator, do not waste your time.' Below this, there are three links: 'subdomain-scanner', 'subdomains-monitoring', and 'subdomains-enumeration'.
