SWSE, SMFE, SPSE, SGDE, SISE, SLAE^{32,64} Course Instructor

Module 2: Introduction to Shellcoding

13. XOR Encoder

Vivek Ramachandran

SWSE, SMFE, SPSE, SGDE, SISE, SLAE³² Course Instructor

<http://SecurityTube-Training.com>

XOR

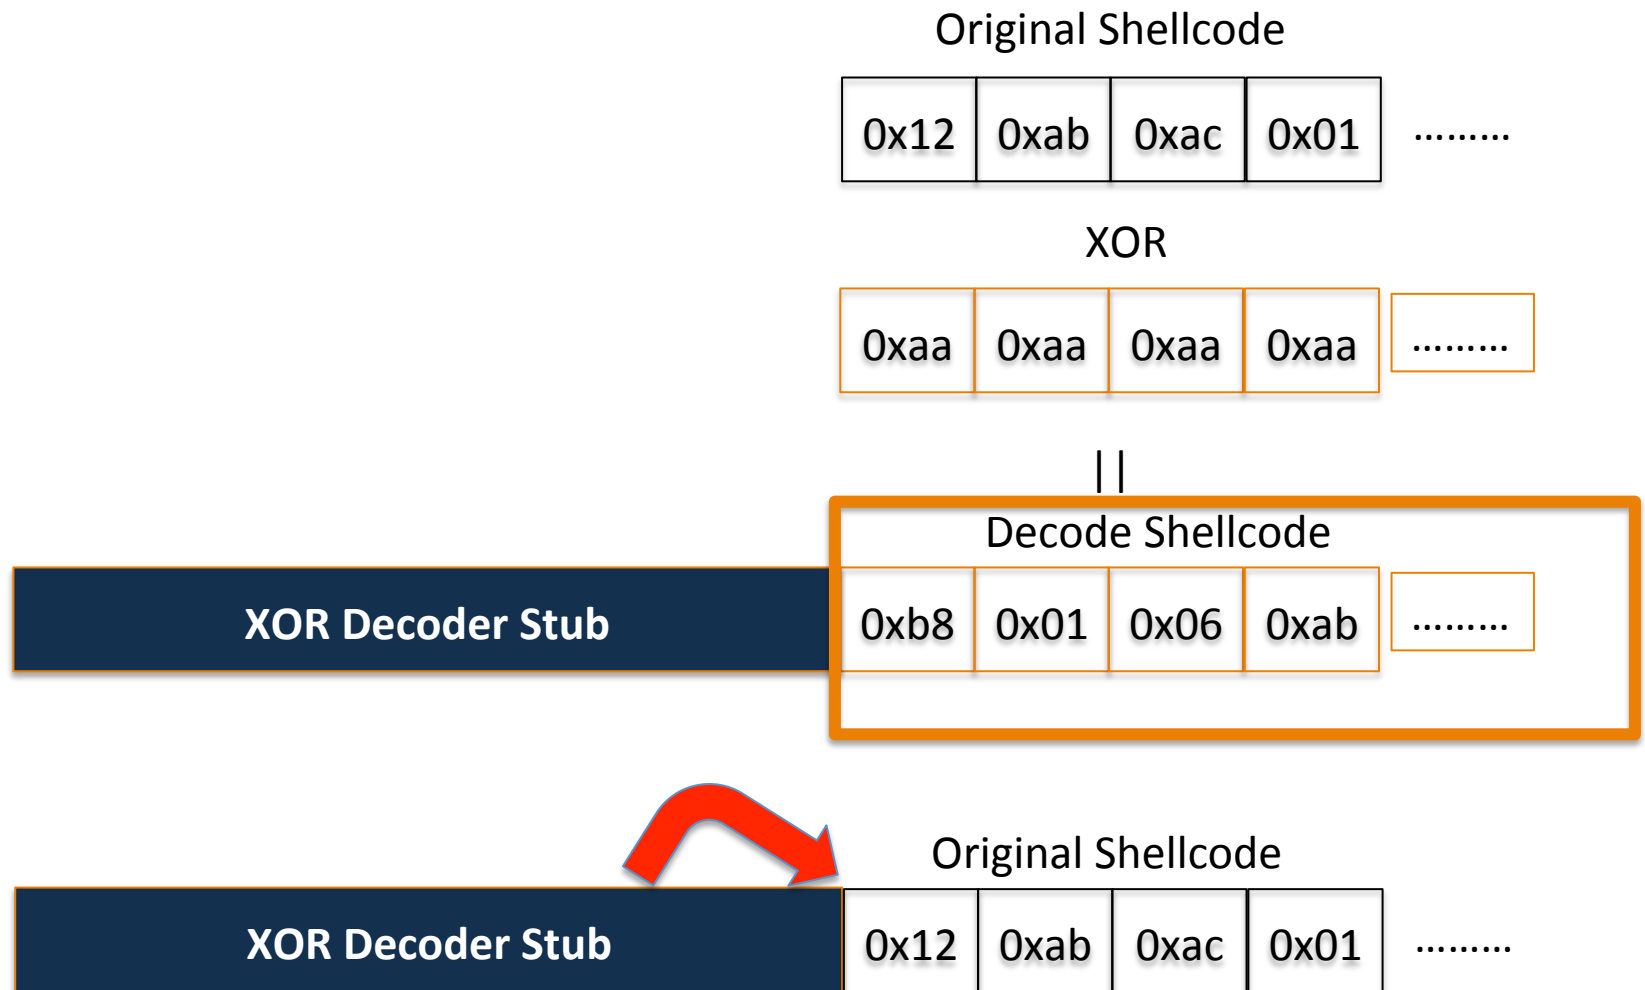

A	B	A xor B
0	0	0
1	1	0
1	0	1
0	1	1

Interesting: $(A \text{ xor } B) \text{ xor } B = A$

What does this mean for us?

- Select an encoder byte e.g. 0xAA
- XOR every byte of Shellcode with 0xAA
- Write a decoder stub which will XOR the encoded shellcode bytes with 0xAA and recover original shellcode
- Stub then passes control to decoded shellcode

Too much text can kill a concept 😊
