Vivek Ramachandran  
Course Instructor

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

## Part 1: Using pexpect

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# Expect and Pexpect

- Expect is an automation tool which allows you to interact with applications and automate tasks
- its been in the UNIX / Linux world for quite a bit
- Pexpect is the python module for Expect

# Exercise

- Explore other modules available for automation of an SSH login process

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

**End of Part 1: Using pexpect**

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

## Part 2: SSH Automation with Paramiko

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# Paramiko

- Allows for easy creation of SSH and SFTP Clients
- Just 5 lines of code to create an SSH Client 😊
- You can also create the same with pexpect and other modules

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

**End of Part 2: SSH Automation with Paramiko**

<http://www.securitytube.net>

**Vivek Ramachandran**  
Course Instructor

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

## Part 3: SSH Dictionary Attack with Paramiko

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# SSH Dictionary Attack with Paramiko

- Take the previous program
- create a loop in the connect()
- read from a file (username:pass) combination
- try for each

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

**End of Part 3: SSH Dictionary Attack with Paramiko**

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

## Part 4: SFTP with Paramiko

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# SFTP

- Is a subsystem and typically uses a SSH transport layer underneath
- extremely easy to get an SFTP connection using the SSH connection
- can automate remote file uploads / downloads

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

## Part 4: SFTP with Paramiko

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

## Part 5: Automating Nmap

<http://www.securitytube.net>

Vivek Ramachandran  
Course Instructor

# Nmap Automation

- Can automate using pexpect or subprocess
- You can use the Python-Nmap library
- Install nmap and python-nmap library

# Module 7: Automation in Python

**SecurityTube** Python Scripting Expert

**End of Part 5: Automating Nmap**

<http://www.securitytube.net>

**Vivek Ramachandran**  
Course Instructor
