# Setting up HTB and Cracking MEOW(Machine)

@mmar

**Hack The Box is a massive, online cybersecurity training platform, allowing individuals, companies, universities and all kinds of organizations around the world to level up their hacking skills**

**It is one of the best Platforms to learn cyber security**

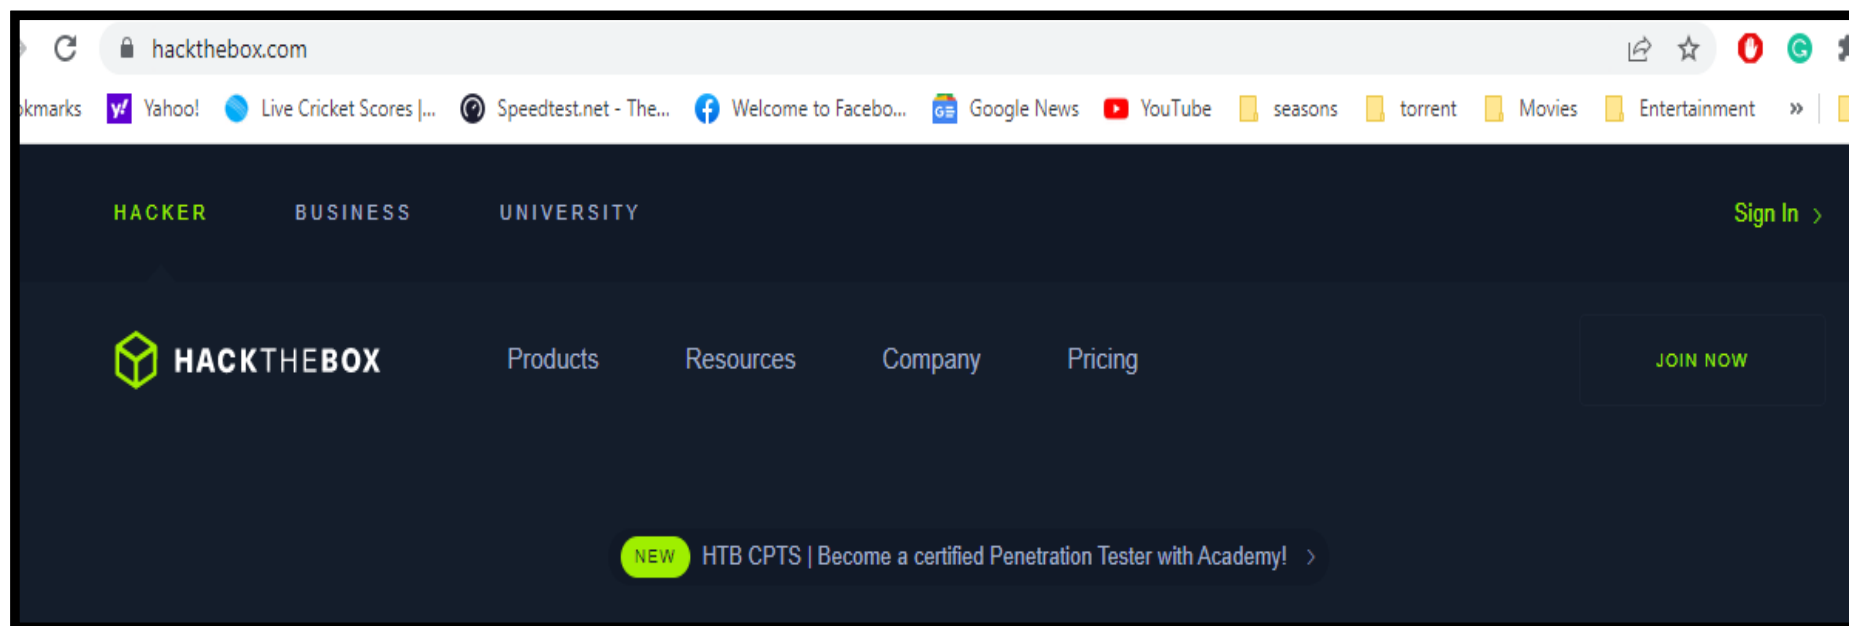

## Pre-requisites

You need to have a Kali Machine to practice  
pentesting

# Step-1

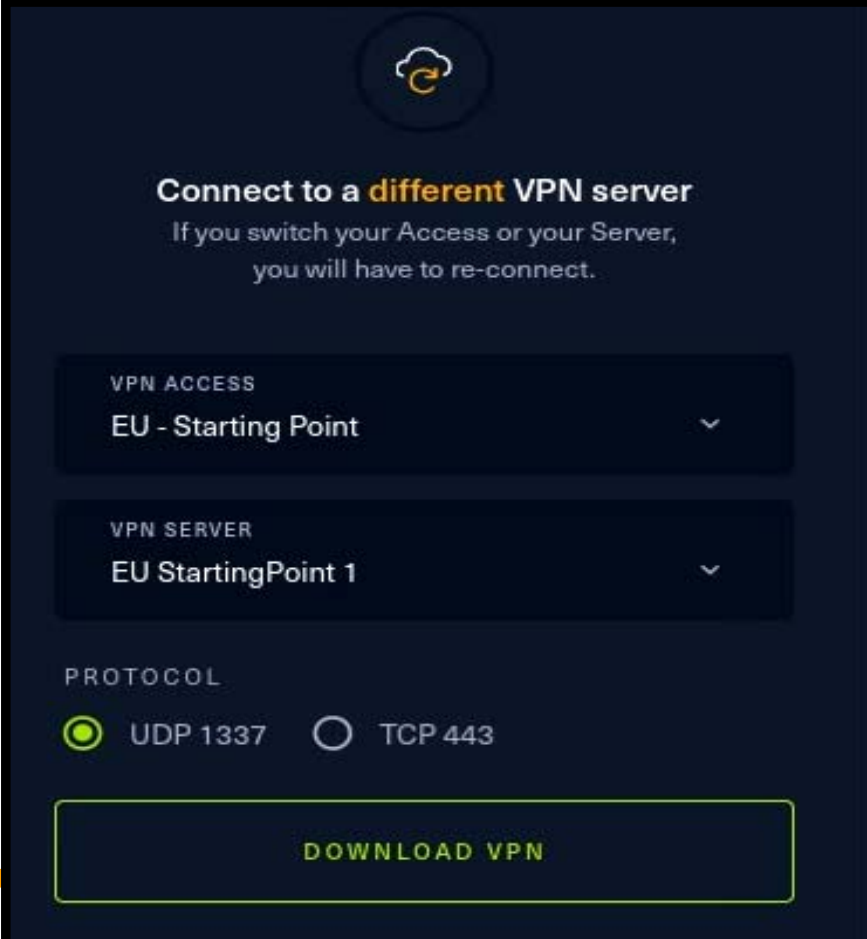

- ❖ Browse HTB and sign up for an account

<https://www.hackthebox.com/>

## Step- 2

- ❖ Download VPN, Connect to the playground and start hacking some machines

The screenshot shows a VPN configuration interface. At the top center is a circular logo with a white cloud and a yellow 'C' inside. Below the logo, the text reads: "Connect to a **different** VPN server" in white, followed by a smaller line: "If you switch your Access or your Server, you will have to re-connect." Below this are two dropdown menus. The first is labeled "VPN ACCESS" and has "EU - Starting Point" selected. The second is labeled "VPN SERVER" and has "EU StartingPoint 1" selected. Below the dropdowns is a "PROTOCOL" section with two radio buttons: "UDP 1337" (which is selected and highlighted with a green glow) and "TCP 443". At the bottom of the interface is a large, rounded rectangular button with a green border and the text "DOWNLOAD VPN" in green.

DEMO

A photograph of a body of water with mountains in the background and a small structure on the right. The word 'THANKS' is overlaid in the center.

THANKS
